Wayfinder Kiosk Range

Our Hardware

Abuzz has a range of standard kiosks that cover most self-service projects. Our Industrial Design team has the capability to customise our existing kiosks or design a completely customised solution (depending on your budget)

Edge: Winner of the Australian Design Award for Excellence in Industrial Design, the Edge is our premium large format portrait kiosk.

Concierge: Wall, stand countertop and desktop use, compact design for all retail applications

Landmark: Aesthetically unrivalled, the Landmark is our latest landscape format kiosk designed specifically for our Wayfinder solution.

Vivid Duo: Robust dual sided kiosk suitable for harsh outdoor conditions (can also be used indoors). This kiosk is a third party product running Abuzz Wayfinding software.

Vivid Slimline: Low cost, large format, high impact single-sided indoor kiosk.

Abuzz has won 4 prestigious Australian Design Awards (from 5 entries) for excellence in both hardware design and software interfaces, cementing its reputation as the innovator and leader in Australia and other international markets.

Landscape vs Portrait

There are no steadfast rules for making a choice between landscape or portrait kiosks as there are so many factors in every urban environment that can effect that decision.

When making a choice between portrait and landscape wayfinding kiosks, our rule of thumb is based on the following considerations:

our portrait kiosks are more suited to showing expanded mapping views across multi-level environments. A portrait kiosk is also more visible in many environments.

If line of sight is a consideration, our landscape kiosk is the right choice for you. Landscape kiosks do not obstruct the eye of the viewer.

37" Edge Kiosk

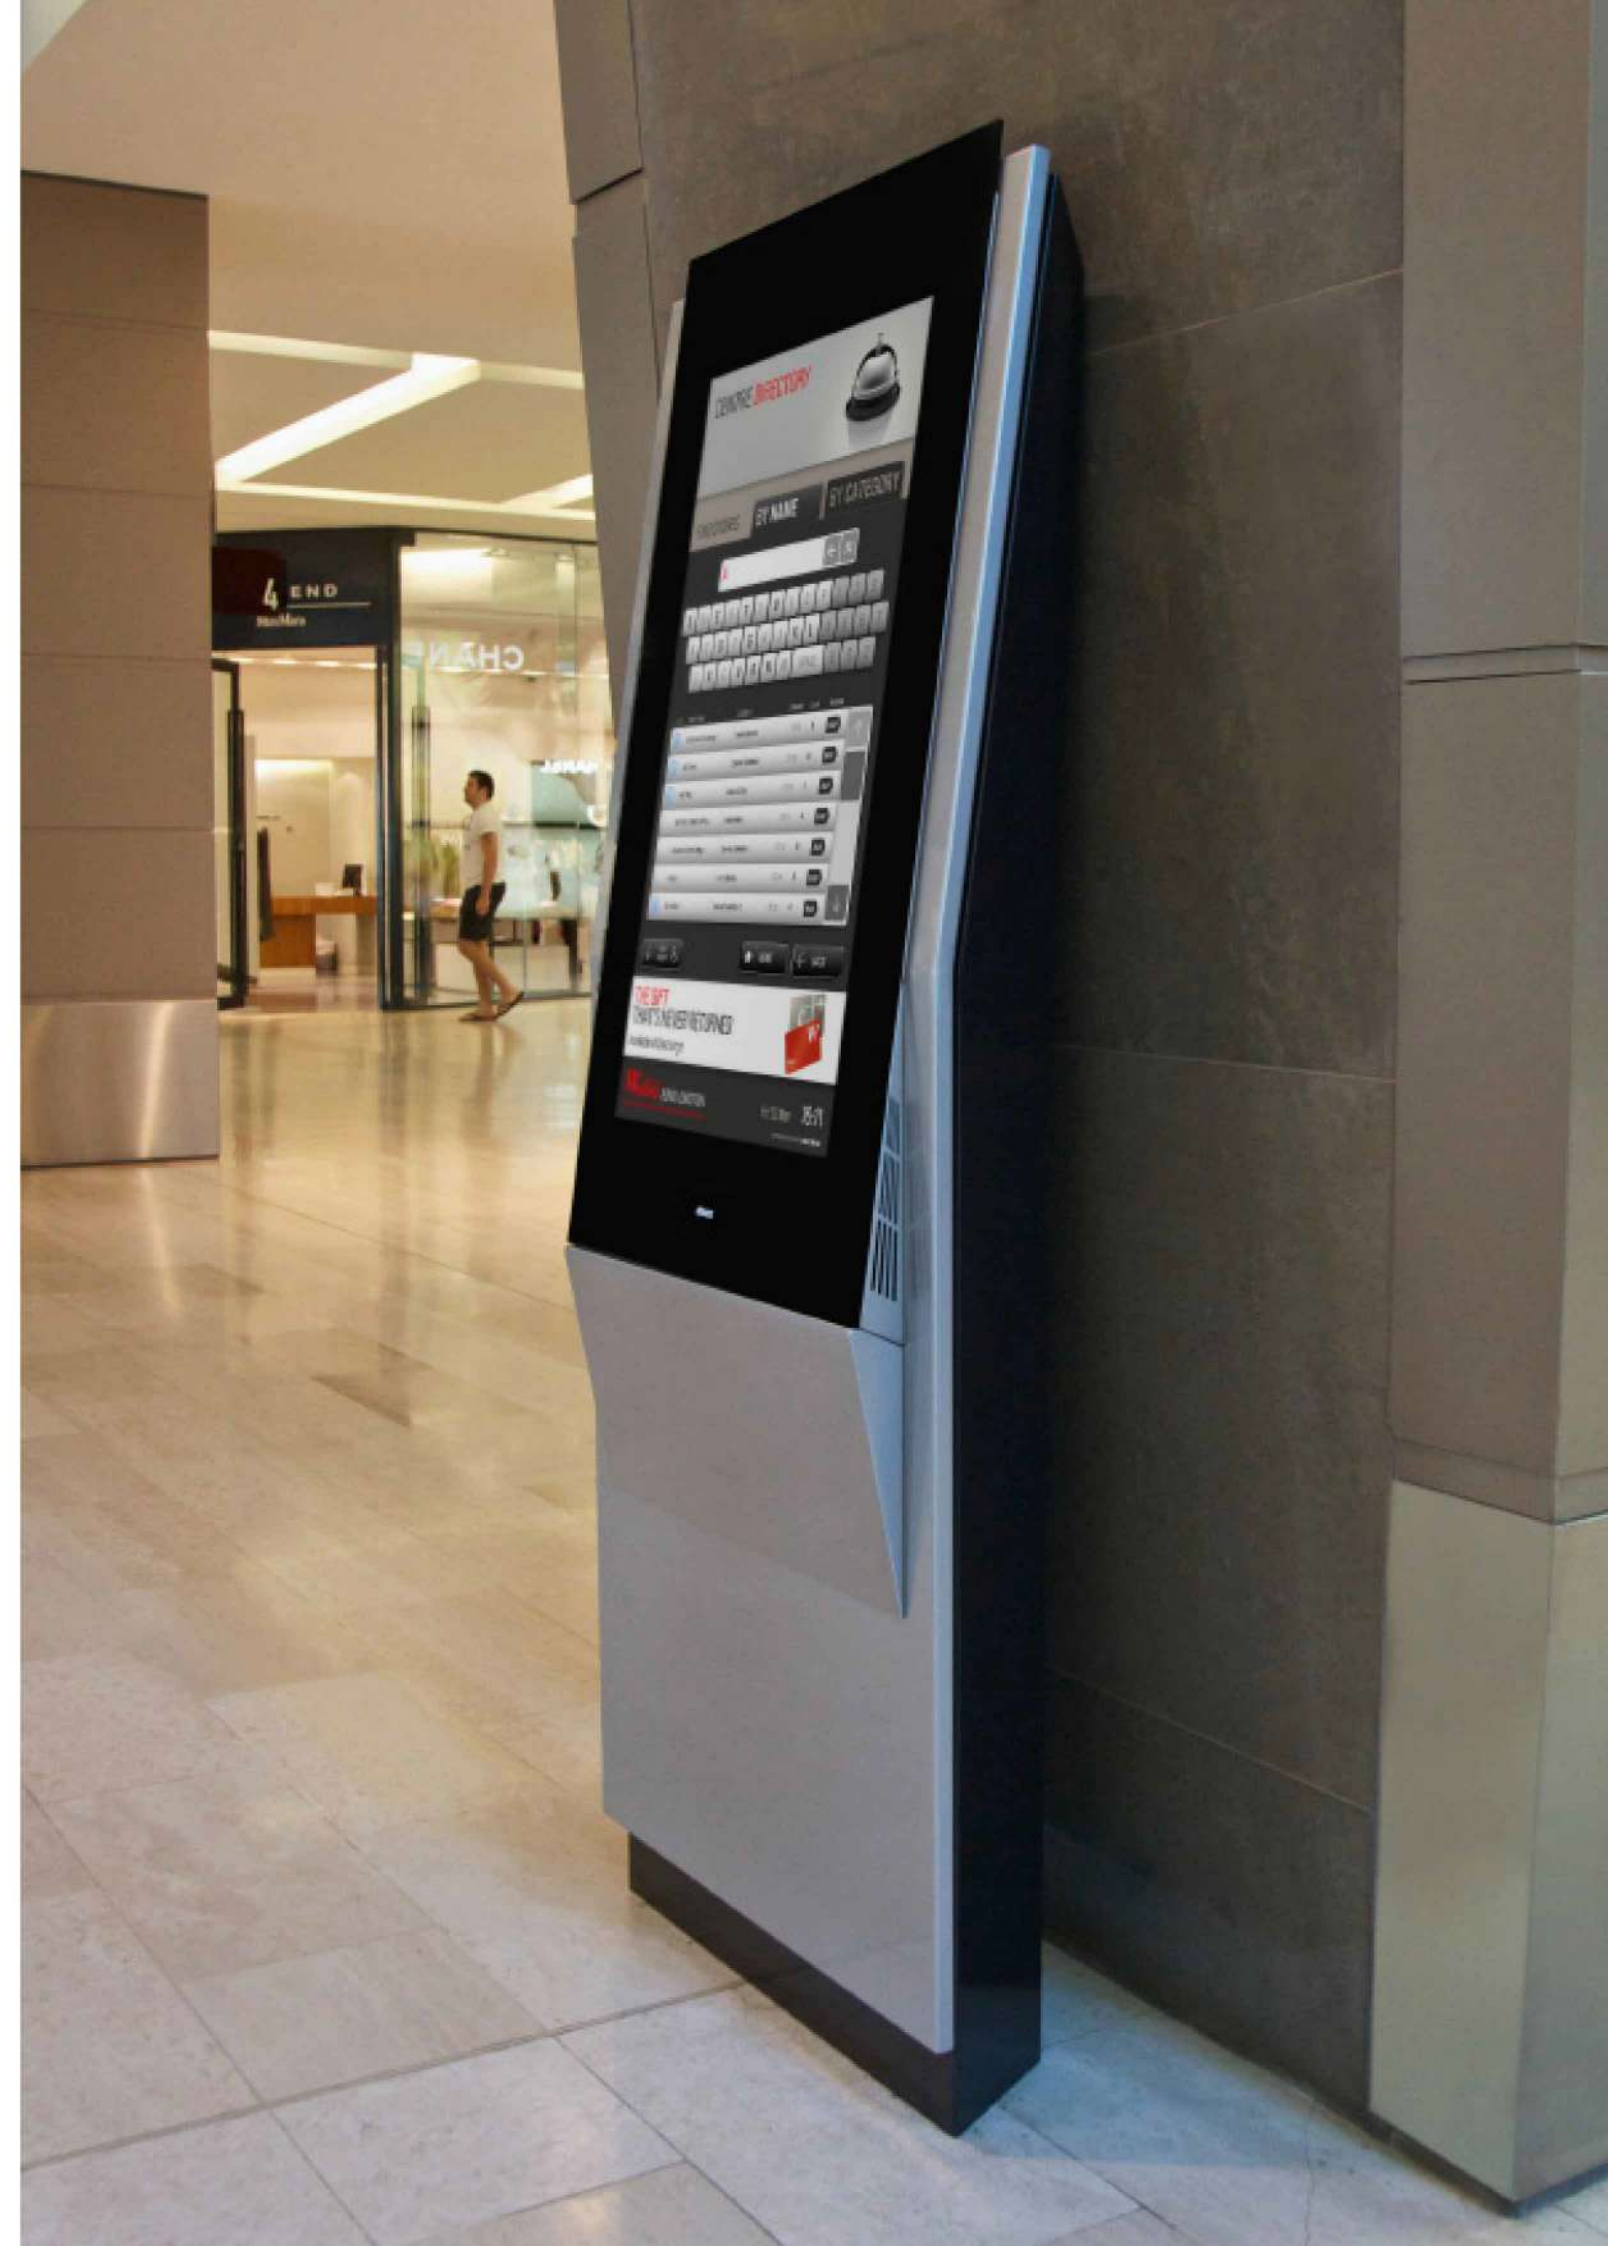

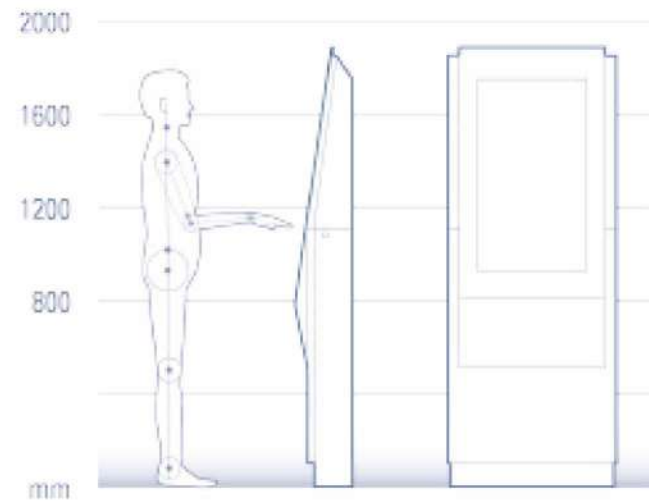

Winner of the Australian Design Award. The Edge is our premium large-format portrait kiosk.

With the highest quality materials and finishes, the Edge is designed to complement the most sophisticated indoor spaces. Ideal for high traffic areas like airports, shopping centres, corporate and government buildings.

The angled face of the Edge sets it apart from non-interactive screens. The ultra-high resolution screen gives a crisp picture and clear text from any angle, and up close. Combined with dynamic software, it presents an alluring invitation to interact with it.

The Edge can accommodate people of all heights, including those in a wheelchair, with an height adjust button (invented by Abuzz).

The front door offers easy maintenance and allows two kiosks to be used back to back for 360 degree access in busy spaces.

FEATURES

- Toughened glass
- Slim with small footprint
- 37" Portrait HD LCD Touchscreen
- Discreet stereo speaker grills
